mortero especial
para rejuntado

argamassa especial
para betumar juntas

Carta de colores
Carta de cores

REJUNTAIS:

Mortero impermeable y coloreado especial para sellado de juntas de azulejos, plaquetas, piedra, mármol, granito. Tanto en interiores como exteriores y también en piscinas.

REJUNTAIS F: Para junta fina, hasta 5 mm

REJUNTAIS G: Para junta gruesa, más de 5 mm

IMPERMEABLE: Evita el paso del agua y disminuye la adherencia de la suciedad.

FLEXIBLE: Permite las pequeñas dilataciones propias de las piezas colocadas.

DECORATIVO: Se presenta en 7 colores básicos, 6 colores preparados, y pueden conseguirse una gran variedad de tonos siguiendo las indicaciones de este catálogo, mediante la mezcla de los básicos con blanco.

MODO DE APLICACION:

- En un recipiente limpio se mezcla con agua hasta lograr una consistencia pastosa, se aplica mediante pistola de rejuntar APLIJUN, o con otros medios adecuados.
- En junta fina se deja secar unos minutos y se limpian los excesos con una esponja húmeda.
- En junta gruesa se pasa una paletina por las juntas y se limpian los excesos con esponja húmeda.

REJUNTAIS:

Argamassa impermeável e colorida, especialmente desenvolvida para betumar e selar juntas de azulejos, peças cerâmicas, mosaicos, pedra, mármore, granito. Tanto no interior como no exterior. Também pode ser aplicado em piscinas.

REJUNTAIS F: para juntas finas, até 5 mm.

REJUNTAIS G: para juntas grossas, mais de 5 mm.

IMPERMEÁVEL: Evita a passagem da água ao suporte e a aderência da sujidade nas juntas.

FLEXÍVEL: Permite as pequenas dilatações específicas dos materiais e peças coladas.

DECORATIVO: Apresenta-se em sete cores básicas e 6 cores preparadas, podendo conseguir-se uma grande variedade de outras cores seguindo as indicações deste catálogo, misturando as cores básicas com branco.

MODO DE EMPREGO:

- Num balde limpo, amassar com água até conseguir uma pasta macia, aplica-se com pistola de betumar Aplijun ou com outros meios adequados.
- Nas juntas finas, deixa-se secar uns minutos e limpa-se os excessos com uma esponja húmida.
- Nas juntas grossas apara-se as mesmas com uma colher de juntas e limpa-se o excesso do produto com uma esponja húmida.

Los colores básicos pueden emplearse solos o combinados con blanco.

Las proporciones de la mezcla pueden hacerse tanto en volumen como en peso.

Los tonos son orientativos y pueden variar respecto al producto aplicado. En el color obtenido influyen la proporción de agua de la mezcla y la humedad relativa ambiente, pudiendo en algunos casos dar lugar a caleos.

El cliente debe realizar ensayos previos para determinar que el color resultante sea satisfactorio.

La variación de tono puede ser sustancial cuando se utiliza REJUNTAIS G.

As cores básicas podem utilizar-se sós ou combinadas com a cor branca.

As proporções de mistura podem ser feitas tanto em volume como em peso.

As cores desta carta são meramente orientativas e podem variar em função da cor aplicada. Na cor obtida têm influência a proporção de água da mistura assim como a humidade relativa, originando nalguns casos manchas de calcário.

O cliente deve realizar ensaios prévios a fim de determinar que a cor final seja a pretendida. A variação será maior se o produto usado for o REJUNTAIS G.

special cement
based grout

mortier de
jointage

Colour chart
Charte de couleurs

REJUNTAIS:

Coloured water resistant cement based grout. Applications: Interior and exterior, swimming pools, smooth and low absorbing grouting on walls and floors of all types of ceramic, glass and marble mosaic, natural stone, concrete-framed glass blocks, etc, easy to apply and finish.

REJUNTAIS F: Joints up to 5mm.

REJUNTAIS G: Joints from 5mm to 15mm.

WATER RESISTANT: Low water absorption and high stain resistance.

FLEXIBLE: Good joint deformability in conjunction with materials used.

DECORATIVE: 7 different basic colours and 6 mixed colours are available. A wide range of shades may be obtained by following the mixing instructions included in this catalogue, when mixing basic colours with white.

APPLICATION PROCEDURE:

- Mix the product with water in a clean container to a smooth consistency. It may be applied with a mortar-dispensing gun (APLIJUN), or traditional proper tools.
- When applying on joints up to 5mm, leave it to dry ten to twenty minutes and clean the excess grout with a clean, lightly dampened sponge.
- When applying on joints from 5 to 15 mm use a finishing tool making sure the joints are completely compacted, with no unevenness. Clean excess grout with a clean, lightly dampened sponge.

REJUNTAIS:

Mortier pour jointoiment imperméable et coloré pour le jointement des dalles de sol, plaquettes de parement mural, pierre, marbre et granit. Utilisable en intérieur, en extérieur et piscines.

REJUNTAIS F: Pour joint fin jusqu'à 5mm.

REJUNTAIS G: Pour joint de plus de 5mm.

IMPERMEABLE: Etanche, diminue l'adhérence de la saleté.

FLEXIBLE: Permet l'effet de dilatation de pièces jointes.

DECORATIF: Se présente dans une palette de 7 couleurs de base et de 6 couleurs préparées. En mélangeant les couleurs de base avec le blanc vous pourrez obtenir la complète gamme de couleurs de ce catalogue.

MODE D'EMPLOI.

Dans un récipient propre, gâcher soigneusement le mortier de jointage avec de l'eau pour obtenir une pâte onctueuse. Appliquer la pâte à l'aide du pistolet de jointage APLIJUN, ou avec un outil adéquat.

Pour un joint fin, laisser sécher quelques minutes et nettoyer la surface avec une éponge humide.

Pour un joint plus épais, étaler le mortier de jointage avec une truelle, puis nettoyer la surface avec une éponge humide.

Basic colours may be used plain or mixing them with white.

Mix ratio could be used in volume or weight.

These are not controlled colours, shade may vary on the applied product. Colour will depend on mixture water content, moisture, causing sometimes efflorescence. Test the mix prior to application in order to get the desired colour. Shade variation might be more noticeable when using REJUNTAIS G.

This is not a controlled colour. Shade will vary depending on natural grey cement.

Les couleurs de base peuvent s'utiliser seules ou en combinaison avec la couleur blanche.

LES COMBINAISONS DES MELANGES PEUVENT SE FAIRE TANT EN VOLUME QU'EN POIDS.

Les couleurs sont approximatives et peuvent varier une fois le produit appliqué. La proportion d'eau et l'humidité ambiante peuvent influencer la couleur désirée, et produire quelques fois un effet de chaux.

Le client devra réaliser des essais afin de déterminer la couleur satisfaisante.

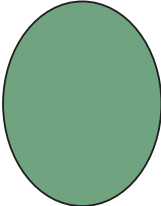

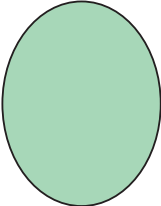

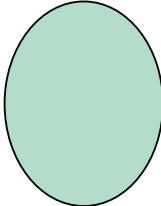

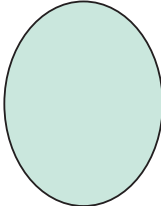

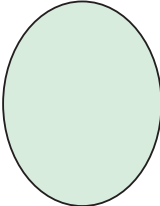

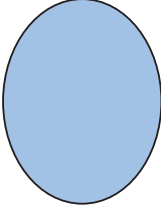

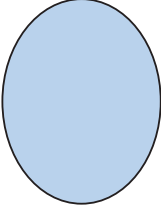

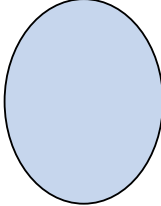

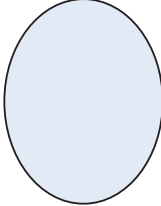

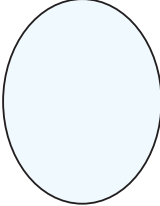

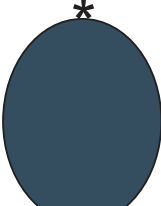

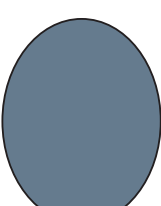

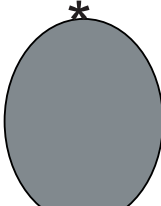

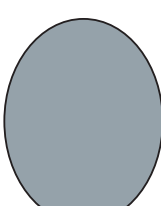

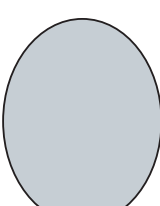

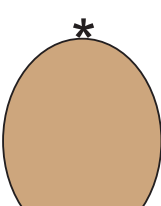

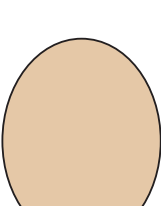

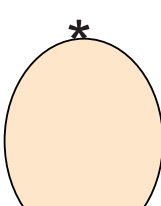

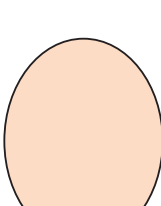

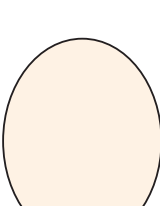

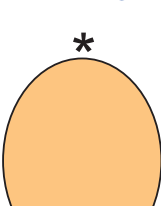

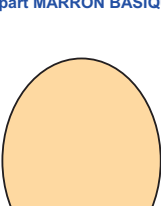

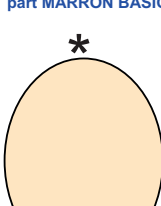

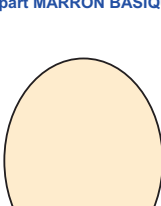

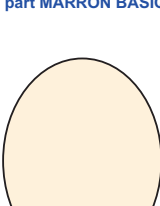

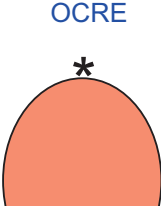

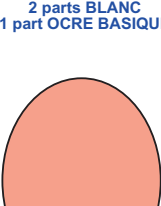

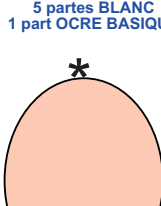

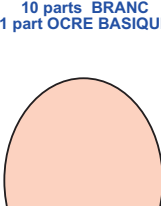

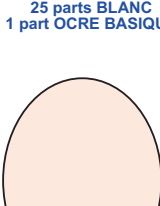

La variation de couleur peut être substantielle lors de l'utilisation de Rejuntais G.
