

Descripción

White fiber in short-yarn shape to reinforce mortars and concretes making a tridimensional armor and homogeneous throughout the mixture. White colour.

Aplicación

In the reinforcement of plaster-renders, concretes, etc. In areas that can be suffer mechanical efforts of bending.

Surface preparation

The surface where the product is applied not requires any special preparation except the same one to the application for mortars and concretes, moulds cleaning,supports, etc

Modes of application

FIBROTAIS is mixed with the other components in mortars and concretes in a proportion of 50 g per 25 kgs of cement.

Clean up

With plenty clean water.

Data sheet

Superficial mass 2400 grs/Km

Diameter Filament diameter: 14 at 37,5 um

Colour/s White.

Performance

50 g per 25 kg cement sack.

Storage

Unlimited time in their original packages protected from weather and stored in cool and dry places.
