

TEAIS HORMI H-250, PRE-DOSED CONCRETE.

Descripción

Pre-dosed and packaged concrete to mix with water in concrete mixer. Very suitable for works where pre-mixed concretes can't be used, for work that requires small quantities of concrete, works in difficult access areas, etc...

Aplication

TEAIS HORMIPRON is used when is not possible to take the ready concrete to the work, works where small quantities of concrete is required, when is wanted to have a concrete with constant and defined performance.

Surface preparation

The normal procedure to make and apply concrete.

Modes of application

- Pour aproximately 2,5 litres of water in the concrete-mixer.
- Next add the content of the two sacks of the product (both sacks come in the same package).
- Don't add any other product into the blend.
- Work with temperatures between 5°C and 30°.

Clean up

Tools must be cleaned with plenty of water while the material is wet. After only can be removed by mechanical means.

Data sheet

Compressive resistance 250 kg/cm²

Composition Cement, sand, gravel and additives.

Composition Particle size: 6 to 11 mm

Water absorption 9%

Performance

2,2 kg/lt of volume to fill.

Storage

Two years in their original packages, tightly closed, protected from the weather and stored in cool and dry places.
