

DUROASFALT, Microconcrete for repair of agglomerate asphalt pavements

Description

Microconcrete of quick setting and suitable resistance for repairing asphalt agglomerate pavements. Available in black colour which made possible to hide the difference between colours.

Application

Duroasfalt is used to make repairs on asphalt pavements.

Surface preparation

The substrate must be clean, free of dust and loose particles and dry .

Modes of application

It is mixed with water to form a thixotropic consistency mortar.

- Extends the previously prepared hole, compacting it with a shovel or pallet.
- It is leveled if necessary and to give proper texture.
- In hot weather it is convenient to keep damp permanently, at least the first 72 hours.

Clean up

Avda. da Enerxía, nº 153, Pol. Ind. de Sabón

15143 Arteixo, A Coruña
