

# DUROASFALT, Microconcrete for repair of agglomerate asphalt pavements

# Descripción

Microconcrete of quick settting and suitable resistance for repairing asfalt agglomerate pavements. Available in black colour which made possible to hide the difference between colours.

# Aplication

Duroasfalt is used to make repairs on asphalt pavements.

## Surface preparation

The substrate must be clean, free of dust and loose particles and dry.

# Modes of application

It is mixed with water to form a thixotropic consistency mortar.

- Extends the previously prepared hole, compacting it with a shovel or pallet.
- It is leveled if necessary and to give proper texture.
- In hot weather it is convenient to keep damp permanently, at least the first 72 hours.

### Clean up

- Avda. da Enerxía, nº 153, Pol. Ind. de Sabón
  15143 Arteixo, A Coruña
  Telf.: 981 602 111
  Fax.: 981 601 508
  - Email.: desarrollo@teais.es

The tools are cleaned with water before the product hardens.

# Data sheet

Colour/sblack Adherence> 0,5 N/sqmm Compressive resistance> 80 kg/sqm Curing density> 1,6 kg/lt

#### Performance

20 kg/sqm per 1 cm thickness

#### Storage

Two years in their original containers stored in a cool dry place, protected from the weather.
