

## Descripción

White paint for decreasing rising-damp, small filtrations, etc. Suitable for avoiding spots by moisture and saltpeter in ceilings and walls. Also, it can be used as a primer on walls recently covered for being painted just after.

## Aplication

LASTOSALIS is a very suitable product for the application on supports with high alkalinity which want to be painted on and for protecting paint.

Also in slight rising-damp before the application of other paints and when integral waterproofing works are not to be done. For avoiding spots by moisture. Avoid efflorescences.

## Surface preparation

The surface must be clean, free of dust, greases or any contaminat agents and slightly moistened.

## Modes of application

The content of the package must be homogenized properly before applying.

- Remove the paint wastes and clean the surface up before applying.
- Before applying LASTOSALIS the surface must be dampened by a sponge or cloth.

Then LASTOSALIS must be applied by brush or roller. Apply two layers with 24 between each application.

- Let it dry completely.

When dries the surface can be finished with a plastic paint.

Also, it can be used as a primer in wall recently covered for the immediate paint application. For its high resistance against alkalinity it works as a protector primer of the finishing paint.

## Clean up

The tools must be cleaned by DISOLUAIS while the product is wet.

## Data sheet

Colour/sWhite

Density1,48 Kg/L.  $\pm$  0,05 g/cm<sup>3</sup> at 20°C.

Viscosity7000 m Pas.

Dry upon touching< 3 Hours.

Temperature of workFrom 5 to 30°C

## Performance

From 3 to 4 sqm per litre.

## Storage

1 year in their original packages, tightly closed and in a dry and cool place protected from the weather.

## Security

## Indications of danger:

H226: Flammable liquid and vapour.

H304: May be fatal if swallowed and enters airways.
