

## Description

Solvent-based primer for fixing water-based plastic paints on new building, fibercement, tiles, old paint in good conditions and for all types of surfaces in general except the glazed surfaces. Shake before using. Solvent: DISOLUAIS.

## Aplication

On painted surfaces (indoors and outdoors) in good condition. When they are in bad condition with flakes, blisters, etc must be removed. On tiles, fibercement or similar. On old coverings and materials that requires superficial hardening. In general on all types of surfaces except glazed.

## Surface preparation

Remove manually the old and deteriorated paint layers, being clean, dry and free of dust and loose particles.

## Modes of application

Homogenize the content of the package before using.

- Don't dilute it.
- It is applied by brush or roller.

It only can be repainted with water-based plastic paints.

Apply on the support one layer and wait 24 hours to paint again with plastic paints.

- Can be used both in indoors and outdoors.

- For outdoors not apply with rain forecast, strong winds, freezes or any adverse weather condition.

## Clean up

with DISOLUAI SOLVENT.

## Data sheet

Density 0,80 Kg./Lt. +/- 0,02
