Once the first coat is dry, two coats more undiluted or slightly diluted between 5% to 10% on weight with water must be applied in a period of time from 2 to 4 hours between layers.

- The support must be clean, dry and free of mold. In polluted supports a deep cleaning must be done with SANEANTE DE MOHO and will be quite rinsed to apply then the paint.
- Supports made of mortar or concrete have cured for at least 28 days.

## Clean up

With plenty clean water while the paint is wet

## Data sheet

Density 1,4 Kg./Litre  $\pm$  0,05 at 20°C

Colour/white and colours under order

Aspect Matt

Dry upon touching < 60 minutes at 20°C and 65% RH

Dry for repainting 12 hours at 20°C and 65% RH

Temperature of work From 5 to 30°C

## Performance

3 sqm per kg

## Storage

2 years in their original packages tightly closed, protected from the weather and stored in cool and dry places.

## Security

## Indications of danger:
